and engraving high and low volume
parts manufacture**

gladtfeld.de

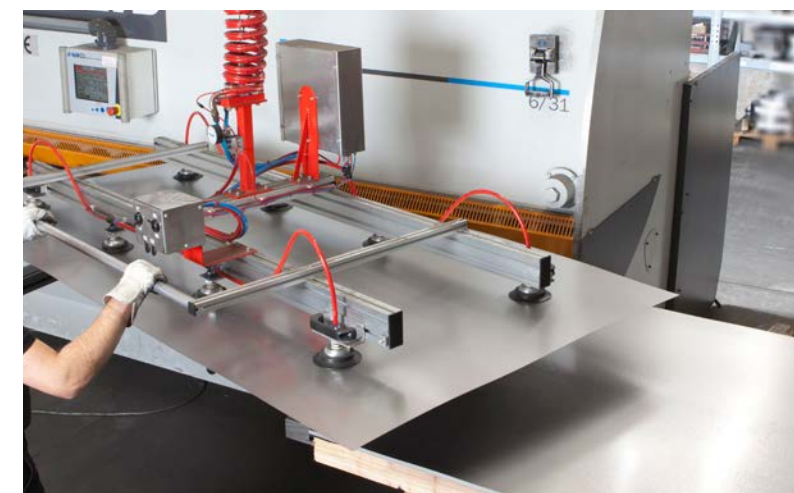

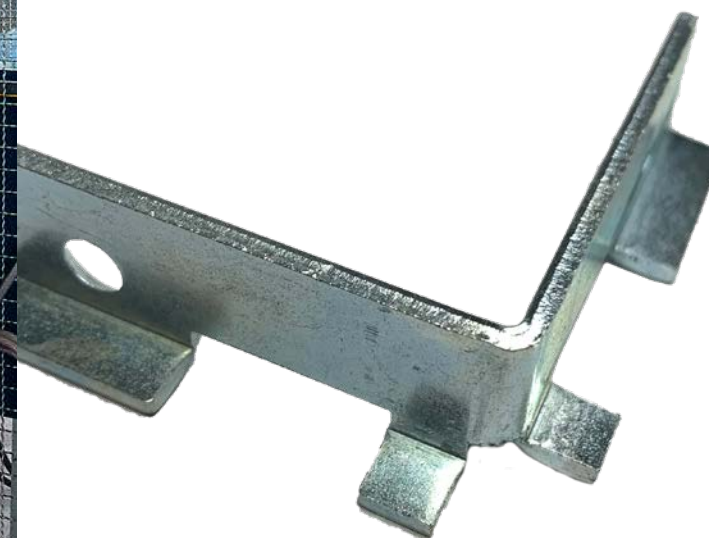

2500 kN of pressure at up to 30 strokes per minute, in stamping and drawing mode, provides economical, cost-effective, production to the most exacting standards.

Table size 1600 mm x 1000 mm
Installation height 900 mm
Stroke 600 mm

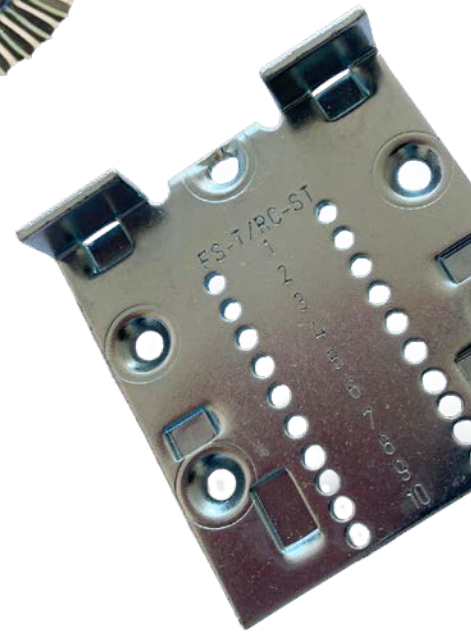

We proudly look back...

... on more than 100 years of having exceeded customers' expectations. Proud of the fact that our customers were so satisfied with our performance that they have maintained an extremely rewarding professional relationship over many years. Testimony to our investments in the company, the employees, manufacturing equipment and logistics.

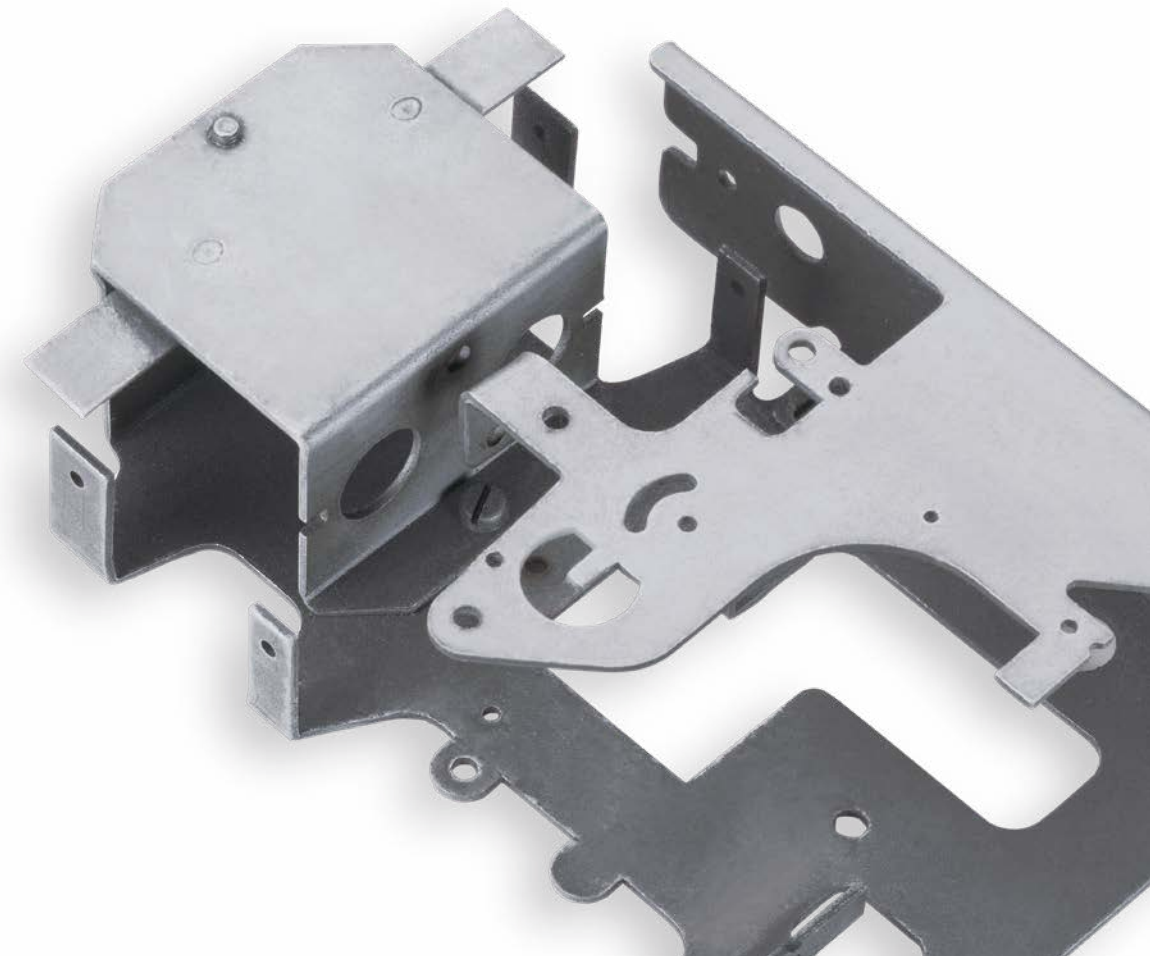

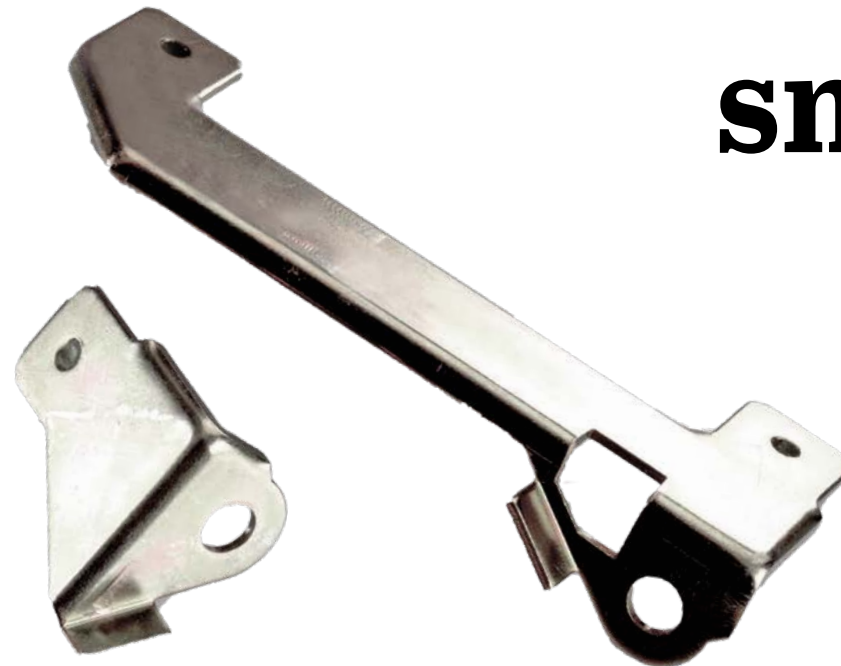

Our **extensive warehouse**, in which we stock coils of the most commonplace goods, enables us to fulfil orders at short notice. Agility and speed paired with fast throughput times are our key to short lead times.

Unique and highly skilled tool & die manufacture – small but potent!

Our in-house tool & die manufacture enables us to act on short notice to fulfil your needs. Our knowledge and experience, gained over many years, can work with you to quickly design and develop the ideal solution for your product.

Embossed metal signs and labels

Unique engravings

Etched signs and labels

Coloured PVC and metal signs and labels

Flexography for adhesive tape

Your product in good hands

Our eccentric presses (capacity up to 1600 kN and 120 SPM) and a number of punching presses (300 SPM) do nothing except run day and night generating individual stamped parts, signs, labels and tags. Your requirements and specifications need know no limits, parts may be round, square, rectangular, coloured, painted, etched, embossed, and of any common metals. They can carry your logo, or your message. As a galvanized single use chip, a cloakroom tag, as a numbered commercial tag or a measurement tag for chains up to 8mm. There is very little that we do not stamp, emboss, engrave or etch, and of one thing you can be certain, if you are in a hurry, we can help.

We manufacture to your specification. . If you wish to supply your own tools and dies or supply free issue materials needed for production. We can accommodate you. If you wish, we can also do further mechanical operations and/or the surface treatment. We look forward to your enquiry.
